GENERAL INFORMATION:

Eligible participating institutions / organizations

- The sending institution / organization must be a Higher Education Institution holding an ECHE
- The host institution / organization [1] must meet one of the following options:

A Higher Education Institution that owns an ECHE; or

- Any public institution / organization or private institution / organization operating in the labor market or in the fields of education, training, and youth. For example, such an institution / organization:

- Small, medium, and large private or public institution or institution / organization (including social enterprises)

- A public institution / organization at local, regional, or national level

- A social partner or other representative of working life, including trade associations, tradesmen / professional associations, and trade unions

- Research institute

- Foundation

- School / institute / training center (at any level, with institutions / organizations operating in the field of pre-school education, high school, and post-secondary education (including vocational education and adult education)

- Non-profit institution / organization, association, NGO

- institutions / organizations that offer career guidance, vocational counseling, and information services

Each participating institution / organization must be in a Program Country. International higher education mobility between Program Countries and Partner Countries will be introduced at a later stage within the scope of Erasmus +.

Duration of the activity

2 to 12 months.

The same student, regardless of the number and type of mobility activities, can receive grants up to a total of 12 months at each educational level [3]:

During the first cycle (undergraduate or equivalent), including the short term (EQF 5 and 6 levels).

During the second cycle (Master's degree or equivalent) including the short term (EQF 5 and 6 levels).

As a doctoral candidate during the third cycle (PhD level or EQF level)

The internship period of new graduates is counted towards a maximum of 12 months of the period they apply for internship.

Place (s) of activity

Students must conduct their mobility activities in a Program Country different from the country of residence and residence of the sending institution / organization

Eligible participants

Students enrolled in a higher education program in any of the education levels (including the first, second, and third stages) within the body of the Higher Education Institution. If mobility is involved for education, students must be enrolled in at least the second year of their higher education. This requirement is not valid for internships.

Graduates from Higher Education Institutions must have applied for internship announcement before graduation to be able to participate in internships. New graduates must be selected by their higher

education institutions during the last academic year and must complete and complete their internship abroad within one year after graduation.

To participate in Erasmus student internship mobility, the higher education institution must have an "Extended" or "Placement Only" Erasmus University Statement.

Activity is that a student enrolled in a higher education institution does an internship in an enterprise or organization abroad. "Internship (placement)" is the process of a beneficiary gaining vocational training and / or working experience within a business or organization in another country participating in the program. The studies, scientific research, and projects that students carry out to complete or support their own scientific studies are not accepted as internship activities. For these activities to be an internship activity, they should be carried out not within the scope of academic studies, but as professional activities with an economic equivalent in the relevant sector.

For example, for product development purposes; Working in experimental studies and research made in a research and development (R & D) company or in the R&D unit of a firm or commissioned by a university or research center by an economic company is considered within the scope of internship activity.

If it is determined from the business plan (Learning Agreement for Traineeships) that the beneficiary candidate selected for internship mobility does not comply with the abovementioned article, it may be decided not to participate in the activity even if he is selected as principal.

The internship activity is not expected to be compulsory for the student's diploma program. However, the economic sector for the internship should be a sector related to the student's current vocational education program.

The activity period starts from 2 months and can last up to 12 months. (Activity that lasts less than 2 months -except for force majeure- will never be accepted. Example eligible minimum duration of activity: 1 November 2019 - 31 December 2019 or 5 February 2020 - 4 April 2020. If the activity starts on the first day of the month, the earliest following month will not be accepted. 60 days does not always mean 2 months.)

However, to ensure that more of our students benefit from internship mobility, the maximum internship period that can be done by our University by receiving a grant is limited to 3 months. given.

Organizations that will host the internship; businesses, training centers, research centers, and other organizations that meet the business definition. In this context, what is meant by an eligible business is any private or public institution / organization, regardless of their size, legal status, and economic sector in which they operate, as well as any type of economic activity, including social economy.

If the institution abroad to be engaged in internship activity is a higher education institution, it is not required to have an Erasmus University Statement as the institution to be visited will be considered as an enterprise.

The following institutions are not eligible for Erasmus internship activity:

- European Union institutions and EU agencies
- Organizations that run EU programs and receive grants in this context

The International Office will award the grant fairly if the allocated grant is insufficient to send potential beneficiaries; The department distributes it by taking into account the ratio of the number of agreements of the faculties and / or departments and the performance of the faculties and / or

departments by making positive discrimination to the department, the country of destination, the balance between boys and girls, and the department that has not previously engaged in mobility activities.

Detailed information can be obtained from the Department / Faculty / Institute / School Erasmus Coordinators.

Applications are free.
